

MADHUJA SURYAWANSHI

Chh. Sambhajinagar, Maharashtra, India - 431001 | +91 8390732978 | madhujasuryawanshi29@gmail.com

PROFILE

Final-year B.Tech student in Artificial Intelligence & Data Science (Minor: Cyber Security) with hands-on experience across data analytics, machine learning, and full-stack development. Skilled in Power BI, SQL, Python, and Excel, with experience building end-to-end analytics solutions, from a research paper on churn prediction to real-world dashboards and cybersecurity tools. Seeking Business Analyst / Data Analyst opportunities.

EDUCATION

B.Tech, AI & Data Science (Minor: Cyber Security) 2023 - Present (Exp. Sept 2027)
MGM's Jawaharlal Nehru College of Engineering (JNEC), Chhatrapati Sambhajinagar, Maharashtra

Higher Secondary Education 2021 - 2023
Vidhyadham Science Junior College

Primary and Secondary Education
Podar International School (CBSE)

EXPERIENCE

Data Visualization Intern Dec 2025 - Jan 2026
Cognifyz Technologies

- Worked with real-world datasets to clean, analyze, and visualize data
- Created charts and dashboards to communicate insights clearly
- Supported data-driven reporting for business use cases

HOD Nominee Jan 2026 - Jan 2027
MGM's JNEC

- Represented the Department of Electronics & Telecommunication in annual college events

Head, Department at Glance Jan 2026 - Feb 2026
MGM's JNEC

- Led department's entry in an inter-departmental cultural competition; won 3rd prize (Rs. 3,000)

Student Panelist, International Conclave on Sustainable Technology Jan 2026
MGM's JNEC

- Selected to present research on Bio-inspired Engineering and Nature-based Solutions

FEATURED PROJECTS

Understanding Consumer Attrition: A Data-Driven Approach to Churn Prediction and Segmentation — Research Paper | Python, Power BI, SHAP | 2026

- Engineered RFM (Recency, Frequency, Monetary) features on 800K+ transaction records from the Online Retail II dataset; derived a recency-based churn label
- Trained and compared Logistic Regression, Random Forest, and XGBoost; selected Logistic Regression (Recall 0.82, ROC-AUC 0.78) using a recall-first, business-cost-aware evaluation
- Applied SHAP analysis to identify purchase frequency as the top churn driver; translated findings into an RFM-based customer segmentation dashboard in Power BI
- Authored full paper with literature review and methodology, targeting journal publication

PassShield: An Integrated Password Security and Behavioral Risk Analytics System — Cybersecurity Minor Project | Python, Power BI

- Built a password strength analyzer and breach checker with an analytics layer for business-relevant reporting
- Designed a Power BI dashboard with KPI cards (Total Passwords Analyzed, Avg. Password Length, Avg. Strength Score, Breached Passwords) and 4 visualizations (Strength Distribution, Breached vs Safe, Length vs Strength, Analyses Over Time)

LandChain: Blockchain-Based Land Registry System — Team Project (3 members) | React, Solidity, Ethers.js, IPFS

- Sole frontend developer; built a 4-view React SPA (Home, Register, Search, Transfer) with MetaMask wallet connection and a React-Leaflet map (Nominatim geocoding)
- Connected frontend to a Solidity smart contract deployed on the Ethereum Sepolia testnet and a Node.js/Ethers.js backend with IPFS document integrity verification
- Completed end-to-end integration and testing across frontend, backend, and smart contract layers

ADDITIONAL PROJECTS

- Basic Indian States Analysis Dashboard | Power BI
- Coffee Vending Machine | Python
- Password Generator | Python

SKILLS

SQL, Power BI, Microsoft Excel, Python, C, Machine Learning (Logistic Regression, Random Forest, XGBoost), SHAP / Model Interpretability, RFM Analysis, SMOTE, Data Analysis & Visualization, React.js, Solidity (basics), Git / GitHub

LANGUAGES

English (Fluent), Marathi (Native), Hindi (Fluent), German (Elementary), Finnish (Elementary)
